SUMMARY

Software Engineer with nearly 3 years of experience building production-grade **Python backend applications, REST APIs, cloud-based solutions, and AI-powered systems**. Strong hands-on experience with **Python, FastAPI, AWS Lambda, AWS EC2, AWS SQS, AWS SNS, CloudWatch, MySQL, SQL, MongoDB, Docker, Git, and CI/CD**. Experienced in developing scalable backend services, asynchronous and event-driven workflows, database integrations, troubleshooting, testing, debugging, and production support. Also experienced in **Generative AI, RAG, Agentic AI, LLM orchestration, and vector search**.

PROFESSIONAL EXPERIENCE

Software Engineer - AI Software Developer Dec 2023 - Jun 2026

RNF Technologies Pvt. Ltd.

- Developed and maintained production-grade **Python backend applications and REST APIs**, implementing request validation, business logic, reusable services, error handling, and scalable API architecture.
- Designed and developed backend services using **Python and FastAPI**, supporting asynchronous processing, API integrations, data processing, and production workflows.
- Worked with **AWS Lambda, AWS EC2, AWS SQS, AWS SNS, and CloudWatch** for cloud-based application development, asynchronous processing, event-driven workflows, monitoring, and troubleshooting.
- Worked with **MySQL and MongoDB** for database integration, CRUD operations, data modeling, aggregation, and application data management.
- Developed and optimized **SQL queries** for relational database operations and troubleshooting of database-related application issues.

- Developed **RAG and AI-powered backend services** using Python, LangChain, LangGraph, vector databases, hybrid retrieval, BM25, embeddings, and reranking.
- Implemented **semantic caching** for repeated and semantically similar requests, achieving approximately **40**
- Used **AWS CloudWatch and application logging** to monitor services, investigate failures, troubleshoot production issues, and improve application reliability.
- Containerized backend services using **Docker** and automated deployments through **GitHub Actions and CI/CD** pipelines.
- Participated in **Agile/Scrum development, code reviews, testing, debugging, and production support**.

Software Engineer - AI Software Developer Jul 2026 - Aug 2026

Intoglo Technologies Pvt. Ltd.

- Developed **Python-based backend services and REST APIs** for production applications, implementing request validation, business logic, database operations, and error handling.
- Designed and delivered production **REST and CRUD APIs**, integrating backend services with databases and external application components.
- Worked with **MongoDB and SQL-based workflows** for application integration, data retrieval, data modeling, and backend operations.
- Engineered asynchronous and event-driven backend workflows for shipment and freight-forwarding business processes.
- Built a production **RAG-based PDF question-answering application** using Python, document processing, embeddings, retrieval, and contextual response generation.
- Troubleshooted application issues through logging, debugging, API testing, and root-cause analysis to improve production reliability.
- Collaborated with engineering and business stakeholders to understand requirements, design technical solutions, implement features, and support production delivery in an **Agile environment**.

SELECTED PROJECTS

AI Gateway Serverless Backend Platform Python, FastAPI, AWS

Personal Project

- Developed a Python-based **AI Gateway** using FastAPI for centralized API access, request processing, LLM orchestration, and backend service integration.
- Designed event-driven workflows using **AWS Lambda, SQS, and SNS** for asynchronous request processing and decoupled service communication.
- Integrated **AWS CloudWatch** for application monitoring, logging, troubleshooting, and operational visibility.
- Implemented hybrid retrieval using dense vector search, sparse **BM25 retrieval**, Cohere reranking, semantic caching, and Agentic Query routing.
- Containerized services using **Docker** and implemented automated deployment workflows using **GitHub Actions and CI/CD**.

EDUCATION

Meerut Institute of Engineering Technology 2019 - 2023

B.Tech in Computer Science / CGPA: 8.01 / 10

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java

Backend: Python, FastAPI, Node.js, Express.js, REST APIs, CRUD APIs, Async Programming, API Design, Middleware, Error Handling

AWS: AWS Lambda, AWS EC2, AWS CloudWatch, AWS SQS, AWS SNS, AWS SES, Serverless Architecture, Event-Driven Architecture

Databases: MySQL, SQL, MongoDB, NoSQL, Vector Databases, Database Design, Data Modeling, Query Optimization

GenAI/ML: RAG, Agentic AI, LLM Applications, LangChain, LangGraph, LlamaIndex, Embeddings, Hybrid Retrieval, BM25, Reranking, Pinecone, RAGAS, LangSmith

Cloud/DevOps: Docker, GitHub Actions, CI/CD, Git, GitHub, Postman

Development Practices: Agile, Scrum, Code Reviews, Testing, Debugging, Troubleshooting, Production Support
